

VT ES Ltd. – Automated Powder Coating Solutions

VT ES has over 30 years of expertise in complex manufacturing solutions, with nearly 20 years of experience in powder coating.

An automated paint booth ensures high-quality surface treatment, while a conveyor system enables efficient material handling.

Solutions tailored to industrial requirements – including, but not limited to: automotive, telecommunications, healthcare...

1

Quality from the ground up: Dedicated masking and sanding stations ensure precise surface preparation.

2

Consistent, durable coating: Our automated electrostatic powder coating line covers the full process—from degreasing to curing.

3

Cost efficiency: Reduced downtime and lower material costs thanks to fast color change and powder recovery.

4

Flexibility: A coating line adaptable to both simple and complex parts, from small to large components.

5

Reliability: Continuous production and quality control, supporting medium and high-volume industrial manufacturing.
